To whom it may concern.

This is a letter of recommendation concerning Nelson White Systems, Inc.

As the Director of Technology, I have had the pleasure to work closely with NWS, Inc for the past 14 years as our major vendor handling our A/V needs.

Recently, we renovated our Upper School and used NWS, Inc. to provide our classroom A/V set ups. They installed a ceiling mounted projector, a podium control system and laptop connections for each of our 34 new classrooms. In addition, they designed and installed an elaborate audio system for our dining hall and reception alcove that has allowed to use those spaces for a variety of both school and non-school functions.

During our time of association with NWS, Inc., we have found their sales staff to be experienced and very knowledgeable, their installation teams dependable, creative and efficient, and their Customer Service personnel courteous and extremely responsive.

The quality of their service and the experience and knowledge of their staff make them an excellent choice as your vendor for handling all your A/V needs.

If you would like an additional information, please feel free to contact me at your convenience.

Sincerely,

S. Thomas Gorski
Director of Technology
